Global Customer Service

We anticipate and meet customer needs with the highest quality products and services in a timely and cost effective manner.

World Wide Availability

We support product development cycles with dedicated sales engineering resources and factory that deliver on time, anywhere in the world.

Service

At Everskill, we have built a singular source, under one name, for all your needs. We dedicate our varied resources to provide you with the service in the fastest possible time. Establishing an alliance with Everskill at the start of your project will bring this full spectrum of capabilities to your design team and will ultimately provide you with a competitive advantage.

About EverSkill

We are the manufactory specially focus on the metal stamping and cabinets products, have many advanced equipments such as AMADA NC Processing line, Auto-painted line, Bystronic Laser Cutter, NC Groove Machine, CNC Puncher as well. We can make complex structure metal plate, Machine case, Meter box, Control box, TV Wall, AD Wall, Stainless Steel light box, etc.

Our professional teams with skilled craft-men, who are company's powerful technology guarantee, have the capacity of changing the mind to true and digital production to protect the quality and can complete the customer requirements for each one faultlessly.

The Tenet of EverSkill is Perfect Product, Competitive Price, Faith worthy Cooperate, Passion Service. Warmly welcome customers to our company visiting.

ISO 9001:2008

Production Equipments

Name	Specifications	Accuracy
AMADA NCT AC250NT	Max. fabrication dimension is 1500mm*3500mm*3.2mm for carbon steel and aluminum; Max. fabrication dimension is 1500*3500*2.5mm for stainless steel.	±0.05mm
Bystronic Laser Cutting Machine	3000mm*15000 ,Max. weight loaded:920kg,Power:4000W Max. material thickness:Carbon Steel:25.0mm; SST:12.0mm; AL(5052):10.0mm	±0.1mm
AMADA Bending Machine	Max. bending thickness can be up to 10mm for carbon steel and aluminum; Max. bending thickness can be up to 6mm for SST material. Max. part length can be bended by machine: 15000mm.	±0.1mm
Punch Press Machine	125T,60T	±0.1mm
Mash Welder	2.5-3mm	
Riveting Machine	Rivet diameter:φ3-5mm;Rivet length:5-20mm	
Argon ARC Welder	AC 220V 50Hz; 3.2KWA	

Assembly

Everskill have automated assembly line and skilled employees, we can arrange the parts from suppliers, check all the parts quality, assemble, and package your products specifications. We are focused on meeting those needs as each customer defines them.

Surface Treatment

We are capable of conducting and managing various finish process:

	In-house	Sub-contract
Debur	Manual debur	Glass-bead spray; Ultrasonic debur
Cleaning	Chemical degrease	Ultrasonic cleaning
Polish	Mechanical polish; Satin/grain finish	Electro polish
Powder Coating		E-coating; Different colour(Per ASTM standard)
Painting	These processes are sub-contracted due to the environmental limits.	Per ASTM standard
Plating		Rolls Zinc plating, Nickel plating, Chrome plating and polish, Gold/Silver plating
Passivation and Oxidation		Stainless Steel passivation; Aluminum oxidation; etc

Test Equipments

Name	Specifications
Height Gauge	0-300mm
Calliper	0-600mm
Micrometer	0-25.4mm
Depth Gauge	200mm/0.02mm
Marble Terrace	1.5um
Die Gauge	0.25-1.3(±0.03mm)
Plug Gauge	4h (4H) , 6h (6H) , 6g (6G)
Round Gauge	0.1-1mm
VQC (View Quality Control)	0.02mm
Salt Spray Test Machine	1. Test chamber size: 90X60X50 2. The laboratory temperature: Salt test method: 35 ± 1 °C corrosion test method: 50 ± 1 °C 3. Saturated air barrel temperature: Salt test method: 47 ± 1 °C corrosion test method: 63 ± 1 °C 4. Spray volume: 1.0 ~ 2.0 5. PH value: Salt test method: 6.5 ~ 7.2 Corrosion Test Method: 3.0 ~ 3.2 6. Laboratory capacity: 270

Quality Control

We emphasize at the quality thinking all across the whole company. The actions that we conduct pre-duty quality training as well as continuous on job training were oriented at developing "quality first" company culture. It's a long journey to establish a good company culture so we care about each step we made so far.

Product Show

Cabinets

Power control cabinet was widely used in power plant as well as power control area. Size varies from standard unit inside PC up to large scale power control unit in the power plant.

Stainless Steel Parts

SST bracket, used on water treatment equipment Main,

Structure Parts

Base for the mixer machine-lots of welding and finish are needed. We also offer one-stop service for these structure parts Sourcing: turning parts/machining parts/injection parts/casting parts, and etc..

Sales Network

“Satisfying Our Customers Equals To Satisfy Ourselves”

Our Sales Network

“Satisfying our customers equals to satisfy ourselves”, based on optimizing our resource and good quality and management system, we keep on developing and innovating to offer our clients the best solution; At the same time our products are also exported to America, Germany, France, Switzerland, Italy Japan, Korea etc our ten countries in the world and we found permanent and stable cooperative relation with them; We will also make good use of our advantage of advanced technique to promote new materials in the new fields and to head and fit the changeable requirement.
